# Empowered Brands

Trusted by **5,000+ brands** and agencies including many **Fortune 100 Companies**

# Features

## Prediction System

A system streamlining data processing and monitoring real-time ad performance. It delivers actionable insights for faster decision-making, enhanced ad effectiveness, and improved ROI.

## Image Generation

Simplifies product positioning and boosts visual appeal. Automating image creation and ensuring brand consistency, saves time and increases engagement.

## Text generation

Simplifies product positioning and boosts visual appeal. Automating image creation and ensuring brand consistency, saves time and increases engagement.

## Chat-to-Ad Creation

Accelerates ad development and aligns content with marketing goals. Using conversational inputs and context-based descriptions enhances targeting and improves conversion rates.

# Tech Highlights

- Flexible & pluggable **multi-agent platform** for Ad generation that can fully add or swap any new LLMs to quickly adapt to any innovation in the generative or predictive space.
- A smart and intelligent **predictive multi-model platform** that can predict the effectiveness of the ad generated with very high accuracy.
- Data Platform for retraining the predictive model for new domains and regions.
